Projects

Book Recommendation System | Python, NLP, Flask, JavaScript

Jan 2026 – Mar 2026

- Built a content-based recommendation system using TF-IDF and Cosine Similarity on book metadata.
- Processed and analyzed text data (title, author, categories, description) to generate relevant recommendations.
- Developed a Flask-based web application with an interactive user interface for real-time recommendations.

Predictive Analysis on Air Quality | Python, Data Science, Jupyter Notebook

Oct 2025 – Dec 2025

- Analyzed multi-pollutant datasets using Pandas, NumPy, and visualization tools to identify trends.
- Built regression, classification, and clustering models to predict and categorize air quality.
- Improved model interpretability and generated insights for data-driven environmental analysis.

Anime-Recommendation system | Power BI

June 2025 – July 2025

- Designed a hybrid recommendation engine for personalized suggestions.
- Implemented model evaluation techniques to optimize recommendation accuracy and scalability of automated outputs.
- Built an interactive Power BI dashboard to visualize user preferences, genre trends, and recommendation performance metrics.

Electric Vehicle Population Analysis Dashboard | MS Excel

Feb 2025 - Apr 2025

- Analyzed public EV population data to study adoption trends, vehicle types, and regional distribution patterns.
- Developed an interactive Excel dashboard using pivot tables, slicers, charts, and maps for dynamic data exploration.
- Extracted actionable insights on EV growth, top manufacturers, and registration trends to support strategic analysis.

Training

From Data to Insights: Hands-On Approach to Data Science | LPU | [Certificate No. 407400](#)

July 2025

Cybersecurity And Real-Time Project | NullClass | [Link](#)

June 2024

Python Industrial Training | Code Sprint | [Link](#)

Mar 2024

Achievements

- Ranked 101/400+ teams at Gear Up Season 4 (36-hour Smart India Hackathon) .
- Conducted successful events like Chakravyuh CTF 2025, Trinetra 2025 and Code-A-Fest 2.0 2024, showcasing strong event management, coordination, and leadership skills.

Certificates / Certifications

Introduction to Machine Learning | NPTEL - [Link](#)

Oct 2025

Legacy Responsive Web Design V8 | freeCodeCamp | [Link](#)

Nov 2023

Skills

Languages: C, C++, Python, Java

Technologies/Frameworks: MS Excel, Git, GitHub, Ubuntu, Power BI, Jupyter Notebook

Domain Skills: Data Structures and Algorithms, Data Analysis, Problem-Solving, Predictive Analysis

Soft Skills: Collaborative, Adaptability, Consistent, Resilience

Education

Lovely Professional University

2023 – Present

Bachelor of Technology - Computer Science and Engineering — CGPA: 7.24

Phagwara, Punjab

Kendriya Vidyalaya No.1 AFS Pathankot

2022 – 2023

12th — Percentage: 80.20%

Pathankot, Punjab

Kendriya Vidyalaya No.1 AFS Jaisalmer

2020 – 2021

10th — Percentage: 92.40%

Jaisalmer, Rajasthan
